Test and Tune (Dyno Rentals)

Price per Unit (hour): \$100.00

[Ask a question about this product](#)

Test and tune dyno rentals days allow you, your team or club to bring in your own tuner but have Hitech operate the dyno. This is the best way for a small group to perform adjustments to their carbureted or EFI system. We strap down your vehicle on our chassis dyno featuring twin 20,000 cfm fans that changes the air every 9 seconds. The dyno cell also has 4 layers of sound deadening material and multiple viewing windows for clubs, teams, and friends to watch cars on the dyno in air conditioned and heating quiet comfort. All this while monitoring air/fuel, RPM, speed, pressure, temperature and humidity on 4 different dyno computer displays in front of the dyno viewing windows. [Live Dyno Video](#) is available via the web anytime of day for those who want to watch from afar. **Test and Tuning Details**

We do not supply tools. If tools are requested, the price increases from \$100 per hour to \$150 and our tech's must perform the repairs.
Minimum Rental Time: 4 hours **Maximum:** 3 vehicles for every 4 hours of rental **Included:** Color printouts with horsepower, torque, and air/fuel. Unlimited runs and all sensors.

How to rent the dyno: Set a date with Hitech Motorsport at (763) 712-9088 then set the number of hours you require. Click 'add to cart' when ready.
